Our course catalogue outlines comprehensive technical implementation, AI readiness and more, tailored for educational institutions.

Module	Solutions	Description
Understanding Microsoft licensing options	Microsoft 365	Overview of different Microsoft licensing models and guidance on selecting the right licenses for various school needs.
Migrating data from Google Workspace to Microsoft 365	Google Workspace Microsoft 365	Considerations when migrating mail, calendars, contacts, files, and forms to Microsoft 365.
Syncing Identities with Entra Connect	AD DS Entra ID	Configuring and managing Entra Connect to synchronise your on-premises domains with Azure AD.
Securing Entra (Azure Active Directory)	Entra ID Purview Microsoft Defender	Best practices for securing Entra, including multi-factor authentication (MFA), conditional access policies, and monitoring.
Managing delegated privileges and roll-based access control for all Microsoft 365 workloads	Microsoft 365	Setting up and managing role-based access control (RBAC) across Microsoft 365 services to delegate privileges.
Maintaining a secure Teams environment for education institutions	Microsoft Teams Sharepoint Online Exchange Online	Configuring Microsoft Teams for safeguarding students to ensure secure collaboration.

Module	Solutions	Description
Managing SharePoint sites	Sharepoint Online Microsoft Teams	Using Entra apps, PowerShell scripts and web admin centers to manage Microsoft 365 service configurations and generate reports.
Automating Microsoft 365 systems administration tasks and reporting with PowerShell and Graph	PowerShell Graph API Purview Entra ID	Using Entra apps, PowerShell scripts and web admin centres to manage Microsoft 365 service configurations and generate reports.
Microsoft 365 Copilot tenant readiness, including best practice data governance for education organisations	Entra ID Purview Power Platform Microsoft 365 Copilot	Ensuring compliance and data security when preparing the tenant for Microsoft 365 Copilot use by staff and students
Microsoft 365 Copilot Chat tenant best practice configuration for use by staff and students	Entra ID Azure Power Platform Purview SharePoint Online	Ensuring compliance and data security when preparing the tenant for Microsoft 365 Copilot Chat.
Upgrading Windows 10 devices to Windows 11	Windows 11 Intune	Planning and executing the upgrade process from Windows 10 to Windows 11, including deployment strategies.
Deploying Windows devices with Windows Autopilot	Intune Windows Autopilot	Setting up and using Windows Autopilot for device deployment to automate device setup.
Enabling Windows simple single sign on with federated third-party identity providers	Entra ID Intune Windows Autopilot	Configuring federated identities for single sign-on (SSO) to ensure seamless user authentication.
Managing devices and apps with Intune	Intune Windows 11	Using Intune to deploy and manage device policy settings and applications.
Setting up Exchange address book policies and information barriers	Entra ID PowerShell Exchange Online	Configuring address book policies and implementing information barriers to control communication and collaboration.

Module	Solutions	Description
Enabling and exporting data from Purview compliance logs	Purview PowerShell	Exporting and analysing compliance data to meet regulatory requirements and internal policies.
Managing School Data Sync	Entra ID Microsoft Teams School Data Sync	Using School Data Sync to integrate your student information systems and automate class creation and timetable updates.
Agents - Art of the Possible for Leadership	Purview Copilot Studio	Showcasing bespoke example Copilot Agents in production, grounded in tenant data (requiring pay-as-you-go consumption) and with access controls.
Agents - Technical readiness	Microsoft 365 Copilot Power Platform Purview Copilot Studio Entra ID	Ensuring compliance and data security when preparing the tenant for creating and deploying Copilot Agents for pay-as-you-go consumption.
Agents - Developer Workflow	Microsoft 365 Copilot Copilot Studio	Walk-through using a basic example workflow for developing an agent, with a worked example relevant to the organisation.
Introduction to Microsoft Purview for Education	Powershell Purview	Using eDiscovery to search unified audit logs and managing cases for data subject requests. Understanding RBAC for compliance roles.
Implementing Information Protection in Microsoft 365	Purview Teams Exchange Online SharePoint Online	Introducing information protection to safeguard data using sensitivity labels for encryption, content marking, and access controls.
Introduction to Data Loss Prevention (DLP) for Safeguarding and Compliance	Purview Teams SharePoint Online Exchange Online	Creating simple DLP policies for sensitive data like HR, and finance. Monitoring for risky sharing.
Implementing Data Retention in Microsoft 365	Purview Exchange Online SharePoint Online Teams	Using retention policies and retention labels to prevent accidental deletion & safeguard evidence.
